PROFESSIONAL EXPERIENCE

IT Service Management Associate (Enterprise AI Support) Jun 8, 2026 – Present
Accenture — St. Catharines, ON

- Provide email-based technical support for enterprise AI-related queries and issues.
- Review, analyze, and respond to customer support requests through established support channels.
- Investigate reported issues and provide appropriate troubleshooting guidance and resolutions.
- Manage support requests while following established workflows, processes, and service standards.
- Escalate complex or unresolved technical issues to relevant specialized teams.
- Leverage Generative AI tools and internal knowledge resources to improve response quality and support efficiency.
- Maintain accurate case records and contribute to knowledge base documentation.
- Identify recurring support issues and share insights to support continuous service improvement.

Product Tester (Electronics) Jan 2023 – Jan 2025
Best Buy (Brampton Warehouse – DC) — Brampton, ON

- Conducted thorough testing of consumer electronics such as computers, laptops, gaming consoles, smartphones, smartwatches, cameras, speakers, and printers.
- Performed data wiping, formatting, and OS installations on various devices.
- Led brief training sessions for new employees to ensure they are prepared for electronic product testing.
- Played a key role in quarterly warehouse sales by processing products for grading based on their condition.
- Conducted product audits to ensure quality control and compliance with standards.
- Utilized Windows programs to monitor product location and status for efficient inventory management.
- Managed product organization for order fulfillment.
- Demonstrated adaptability by assisting with additional technical and logistics tasks as needed.

Global IT – Service Desk Analyst Mar 2022 – Oct 2022

Lucy Electric Manufacturing & Technologies — Global Support

- Created and deleted domain and email credentials for new hires and departing employees in a hybrid AD model (Cloud & Windows-based).
- Provided L1 Service Desk support as the first point of contact for ~1,000 global users, resolving 15–20 tickets per day while maintaining SLA compliance.
- Distributed applications via desktop and mobile versions of the Software Centre Management Tool (MDM).
- Managed the ServiceNow ticketing platform to assign tickets to Level 1 and Level 2 teams (P1/P2).
- Participated in major incident communications, coordinating updates and maintaining Red/Yellow/Green outage status indicators.
- Produced and updated knowledge base articles, as necessary.
- Set up guest Wi-Fi accounts using the Meraki tool and configured VPNs for remote work users.
- Granted folder/printer access per established procedures.
- Provided global remote assistance and phone support across multiple countries including Brazil, Thailand, China, Malaysia, South Africa, Saudi Arabia, UK, India, and UAE.
- Escalated LogicMonitor alerts to the relevant teams regarding network/server issues.
- Resolved problems with desktop applications, slow computers, printers, networks, Outlook configurations, video conferencing, and audio conferencing.
